

Exploring - Excel

Exporting data to excel, editing it, and re-importing it has never been easier than with eaDocX and Excel.

Section: BasicChart

1.1 This should be Chart1

Should be a Heading 2, and this is the description of the chart, which prints above the chart

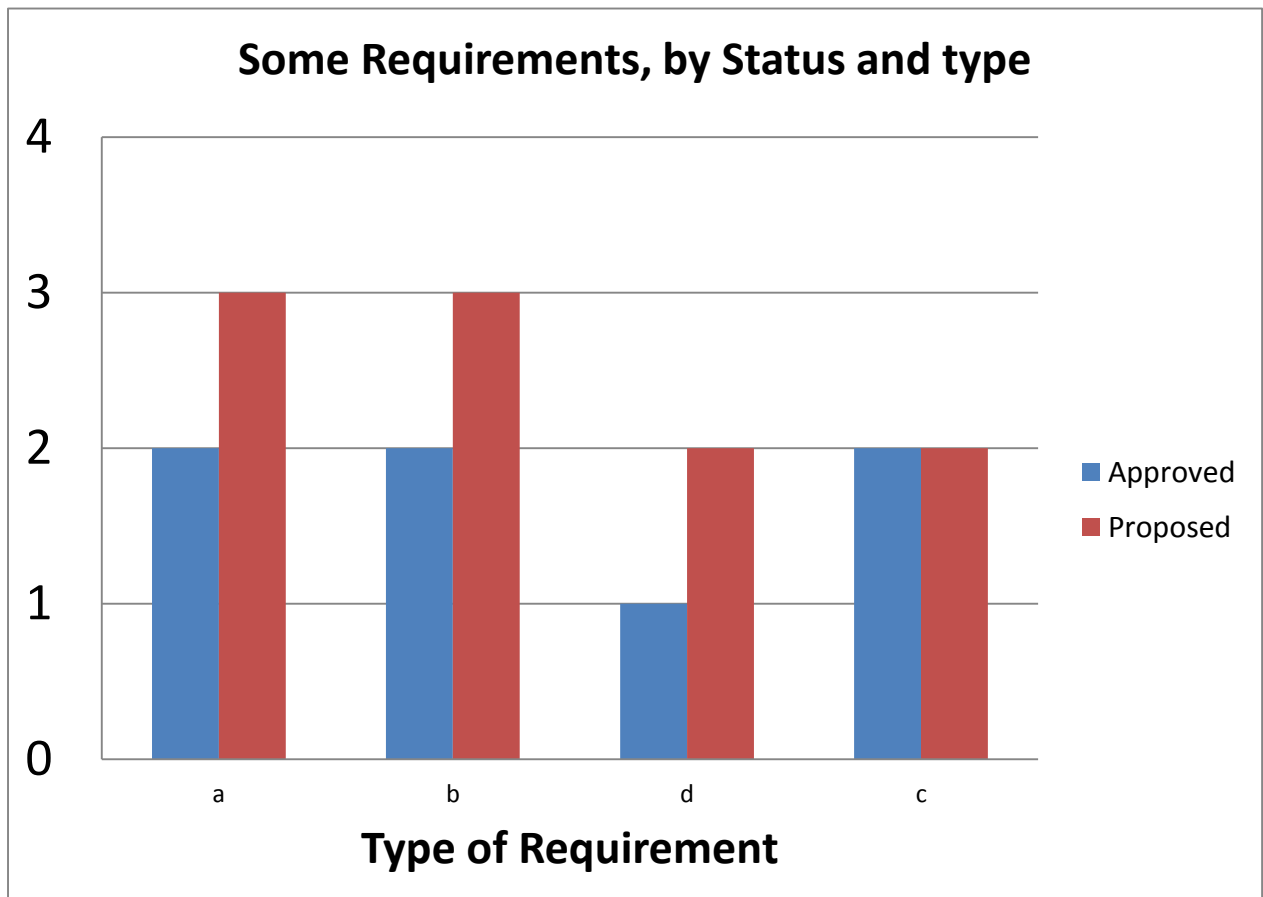

Figure 1 : Chart 1 from the report example

..and this is some more detail, which prints below the chart

End

Section: Scaled

1.2 Smaller version of Chart 1

This chart has been scaled-down from the one in Excel, in this case, by about 50%.

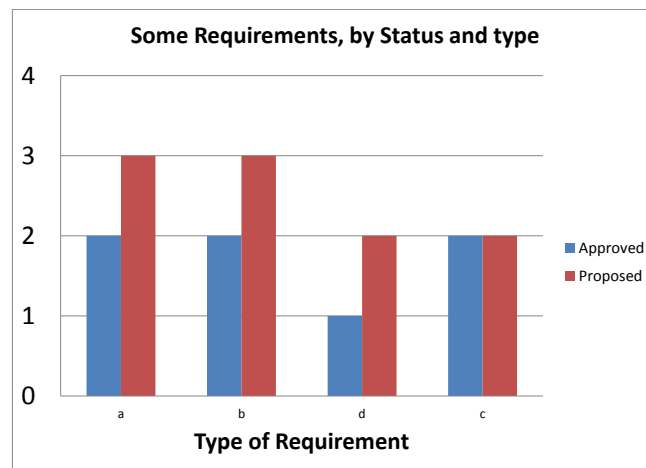

Figure 2 : Scaled-down Chart 1

To show how chart scaling works. Note that the chart image uses a Word Style which places it in the middle of the page. We just think it looks nicer.

End

Section: ExcelTable

2 A little table

Taken from the Excel spreadsheet

Type	Approved	Proposed
------	----------	----------

a	2	3
b	2	3
d	1	2
c	2	2

End
